

A Lecture on Relativity and Related Topics Intended for a General Audience

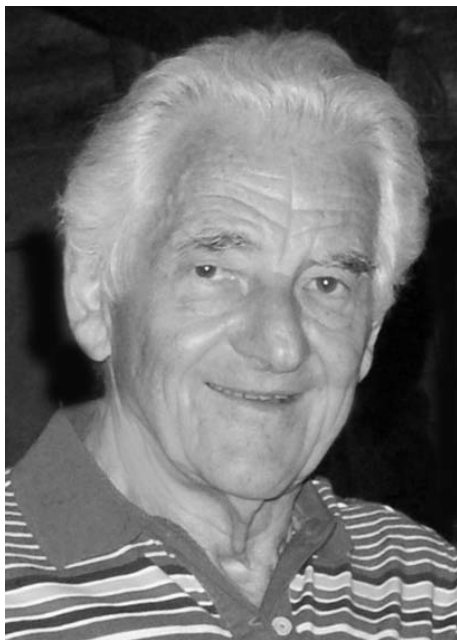

Saturday Seminar, April 9, 1-3 pm

Adult Community Education of MV

Introduction to General Relativity -- History & Science Course HS # RS

Location: MV Regional High School - in the Library

From the time of its first publication, relativity has been regarded as something that is intelligible solely to an elite core of scientists. However, this need not be the case. The basics of relativity are quite straightforward. It is indeed possible to present the concept of relativity and related areas of science in terms that are familiar to almost everyone.

Dr. Eric Brodheim received the Doctor of Engineering Science degree from Columbia University in 1968. He has also held a number of research and teaching positions at Columbia, the most recent being Senior Research Scientist and Adjunct Professor of Operations Research
